Transasia launches a new blood analyzer

Transasia, a leading invitro diagnostic company has added a new product to its diagnostic line with the launch of its ERBA EBG Stat- Fully Automated Critical Care Analyzer. Aimed at clinicians working with large samples of Blood gas/electrolyte/metabolites analysis, the ERBA EBG offers quick results with an accurate analysis.

EBG Stat is based on the Micro Sensor Cartridge (MSC) Technology. The miniaturized sensor card replaces all periodic procedures for electrode / membrane replacements and is maintenance free.
