Top 20 bioSupplier Survey: 21-25

21: SISCO research Laboratory

ESTABLISHED in 1975, it is the first Indian company specialized in the supply of Bio-chemicals and Organic Reagents. The company has performed very well in FY14, having increased its range of highly purified diagnostic reagents, biochemical probes, molecular biology reagents, and nano compounds. The company has continued to widen its range of proteins, carbohydrates, ionic liquids, specialty bioreagents, graphene based nano materials, thin and multi-walled CNT's, and a high range protein markers for research.

22: Biohouse Solutions

THE BIOHOUSE Solutions serves healthcare institutions, lifescience researchers, clinical laboratories, pharma, and biotech industry. The company has created a separate vertical for instrumentation and increased the strength of its technical team. It has signed up with four European multinationals. During the year, it has launched Thermo instrumentation range products and Roche products in Delhi-NCR market. The company plans increased thrust on a pan India presence with enhanced focus on South India.

23: eDiscovery Automation

eDISCOVERY Automation was incorporated in the year 2012. It is a progressive laboratory automation and automated analyzers distribution company providing world class systems and solutions from reputed overseas manufacturers for R&D, quality control, and industrial process. For FY 2013-14, it recorded revenue of Rs 4 crore, up by Rs 3 crore from its last FY 2012-13, which stood at Rs 1 crore.

24: Bio-Age Equipment & Services

BIO-AGE Equipment and Services is involved in manufacturing, sales, and services in the area of industrial biotech products like fermenters or bioreactors up to 10,000 liters capacity, water purification systems and other biotechnology equipment. The major foreign principals include Grant Instruments, UK; Picodrop, UK; and E-Chrom Tech, Taiwan. The company is directly responsible for the sale and after sale services for these products in India. It plans to launch UF, RO, NF filtration products in the future.

25: 3B Blackbio Biotech India

THIS is an Indo-Spanish joint venture company of Kilpest India Ltd and bio tools B&M Labs, Madrid, Spain. It provides integrated solutions in areas of molecular diagnostics, pharmacogenomics and life sciences R&D. The company has recently launched the bacterial sepsis identification and fungal sepsis identification kit through pyrosequencing in six hours. It has also introduced real time PCR based affordable kit for infectious disease and oncology parameters.
