Now approach pharmacists for free consultation

Confused about your prescription? Not to worry any more. Indian Medical Association (IMA) has started a free-of-charge consultation for patients, where they can consult a pharmacist at the IMA headquarters.

This consultation will enable patients to get more information about the drugs they have been prescribed, and how they are responding to the drugs.

Patients also will have the advantage of discussing any side effects and appropriately report it to their physicians.

The pharmacist will be available for 8 hours a day. The project is said to go through further expansion for accommodating more patients in the future.
