Zumutor Biologics partners with Bhami Research

Bhami Research and Zumutor aim to work in collaboration for a unique portfolio of crystallization enabled Mabs which will be supported by Zumutor's analytical tool kit of niche services.

This collaboration will also enable a joint offering for Zumutor's Biosimilars and ADCC improved antibodies using Bhami's crystallization technologies.

BRL is a Mangalore based company that works in the area of protein purification, analytical characterization and formulation.

Zumutor Biologics Inc is a pre-clinical stage biologics discovery and development company, headquartered in Woburn, MA with Research & Development facility in Bangalore, India.
