Sky is the limit

3B BlackBio is an R&D based Indo-Spanish joint Venture company and is dedicated to develop innovative products to be used in biotechnology; mainly lifesciences and molecular diagnostics. The firm clocked a total revenue of Rs 1.01 crore in the financial year 2014-15, a slight increase of seven percent from Rs 0.94 crore in the fiscal 2013-14.

However, the firm is eyeing a growth of 150 percent in the present fiscal. The firm's future plans include creating awareness of Molecular Diagnostics (MDx) and simultaneous creation of network of molecular diagnostic centres (franchisee based) in secondary towns to make molecular tests affordable to masses, to develop PCR kits for key Oncology parameters, with affordability as main object.
