Centre For Sight aims to invest Rs 300-500 Cr in next few years to support expansion plans

04 September 2024 | News

Expands footprints, inks strategic collaboration with Laxmi Eye Hospital in Maharashtra

Centre For Sight, a leading network in Ophthalmology nationwide, renowned for its cutting-edge technology, and trusted medical expertise, has announce a strategic collaboration with Laxmi Eye Hospital, a distinguished eye care provider with a

legacy of over three decades. This partnership marks a significant milestone in Centre For Sight's expansion strategy, enhancing its presence in Maharashtra to 9 centres.

Centre For Sight is looking to invest Rs 300-500 crore over the next few years to support its expansion plans.

Presently, Centre For Sight serves over a million patients annually, at 82 centres across 40 cities from 15 states of India with over 350 expert doctors and ~2700 professional staff onboard collectively.

Laxmi Eye Hospital, established in 1989, has been serving over 2.5 million patients across four locations - Panvel, Khargar, Dombivili, and Kamothe. It is equipped with the latest infrastructure and technology (including FEMTO for bladeless cataract) to provide comprehensive eye care services.

Over the past 12 months, Centre For Sight has added 10 brownfield centres with strategic collaborations, such as Srinagar (Fazili Eyecare), Sikar (I Max Eye Care Hospital), Warangal (Kakathiya Eye Hospital), Badlapur (Drishti Eye Hospital), Chembur (Rushabh Eye Hospital & Laser Centre) and the latest one in Mumbai (Laxmi Eye Hospital).

On the other hand, Centre For Sight has also launched six greenfield centres - Bhiwani, Palwal, Jammu, Gorakhpur, Prayagraj, and Gurugram; further strengthening presence in Northern India.

Centre For Sight will continue to look for more collaboration opportunities in the region, which is a key focus area of expansion, to deepen its presence in Western India. Further, it aims to add 15-20 centres annually, targeting to reach 150 centres in the next 4 years with our commitment to the 'Go Deep and Go Wide' strategy.

The recent strategic investment from ChrysCapital in Centre For Sight has further amplified its growth journey, enabling it to reach even more communities with advanced ophthalmic care.
