Lupin buys nine brands of medical nutritional institute in South Africa

04 October 2024 | News

Lupin to expand footprint in the Complementary and Alternative Medicines sector

Global pharma major Lupin has announced that its South African subsidiary, Pharma Dynamics, has acquired nine brands along with their associated trademarks, from the Medical Nutritional Institute SA (MNI) in South Africa, through a partnership

deal with ImpiloVest, a South African investment firm.

The acquired brands include AntaGolin, RyChol, NeuroVance, SkinVance, FlamLeve, Rheumalin, SleepVance, ImmunoVance, and OviVance. These products cater to a range of health issues such as metabolic syndrome, insulin resistance, cognitive function, skin health, inflammation, joint care, sleep quality, immune support, and women's hormonal well-being.

MNI is dedicated to developing and offering phytochemical (plant-based) products and healthcare solutions, aimed at treating metabolic syndrome. This acquisition will enable Lupin gain access to MNI’s wide portfolio of nine brands, that are marketed as branded products in the South African retail sector.

Thierry Volle, President EMEA, Lupin said, “This acquisition is a major step for Lupin to expand our footprint in the Complementary and Alternative Medicines sector. MNI's innovative plant-based products align perfectly with our goal to provide holistic and sustainable healthcare solutions to our patients in South Africa."
