Maxivision Super Speciality Eye Hospitals invests Rs 100 Cr to expand network across Chennai

01 August 2025 | News

Expansion in Chennai with the launch of 10 eye hospitals/vision centres

Maxivision Super Speciality Eye Hospitals, one of India's fastest-growing eye care providers, has announced its strategic expansion in Chennai with the launch of 10 eye hospitals/vision centres across Chennai.

With an investment of Rs 100 crore, Maxivision aims to expand its network across Chennai, starting with this launch. Maxivision already operates eye hospitals in Trichy, Madurai, Salem, Tanjore, Kumbakonam, Perambalur, and wishes to expand into all districts/towns across Tamil Nadu to fulfil its mission to deliver advanced, affordable, and community-centric eye care across Chennai & Tamil Nadu.

MS Dhoni also launched SiLK Elita- Chennai's first flapless, blade-free laser vision correction procedure- offering a pain-free experience, next-day recovery, and minimal dry-eye risk at its Anna Nagar premises.

Dr GSK Velu, Chairman & Managing Director of Maxivision Super Speciality Eye Hospitals, said, "It is long-term overdue for us, and we are pleased to arrive in Chennai, where Maxivision's corporate headquarters is based. Today marks a strategic step forward in expanding our footprint in the high-demand, high-potential market of Chennai. Our Chennai grand launch by MS Dhoni is aligned with our long-term vision to build a strong, decentralised ophthalmic infrastructure that can effectively address the growing burden of cataract, retina, glaucoma, and several other vision disorders. It also strengthens our talent ecosystem by creating avenues for ophthalmologists, optometrists, and allied professionals to thrive within their local communities. With this expansion, Maxivision reinforces its commitment to shaping the future of eye care delivery in Chennai and Tamil Nadu."

Dr Shibu Varkey, Regional Medical Director of Maxivision Super Speciality Eye Hospitals, added, "Our mission is to bring advanced, accessible eye care to underserved and middle-income communities across Tamil Nadu. With state-of-the-art technology and a strong focus on early diagnosis and preventive care, we aim to reduce the region's long-term disease burden and establish Tamil Nadu as a hub for clinical excellence and ophthalmic skill development. The centres will serve as the first point of contact for early diagnosis of conditions like diabetic retinopathy, cataract, and glaucoma, helping reduce the long-term disease burden through timely intervention and education."

Prof Dr B Ganesh, Clinical & Academic Director, Maxivision Eye Hospitals, said, "The launch of 10 Super Speciality Eye Hospitals across Chennai marks a significant milestone in our mission to make world-class eye care accessible to every corner of the Greater Chennai region. We will start several academic initiatives to train Ophthalmologists, Optometrists , Counsellors & Para medical professionals as part of CSR initiatives across Tamil Nadu."
