BTS 2025 to host Indiaâ??s largest entrepreneurship platform â??Future Makers Conclaveâ?• on Nov 20

04 November 2025 | News

Future Makers Conclave to be Indiaâ??s largest entrepreneurship platform for young innovators and disruptors

Ahead of the 28th edition of the Bengaluru Tech Summit (BTS 2025), scheduled to take place from 18 to 20 November 2025 at the Bangalore International Exhibition Centre (BIEC), the Department of Electronics, IT & Bt, Government of Karnataka, held a press interaction to announce the Future Makers Conclave (FMC) — a first-of-its-kind initiative and a major highlight of this year's summit.

The event was attended by Priyank Kharge, Minister for Information Technology, Biotechnology, and Rural Development & Panchayat Raj; Dr Manjula N, Secretary, Department of Electronics, IT, Bt & S&T; and Rahul Sankanur, Director, Department of Electronics, IT & Bt and Managing Director, KITS.

Highlighting the significance of this initiative, Priyank Kharge described the Future Makers Conclave as India's largest entrepreneurship platform for young innovators and disruptors. He noted that the event will serve as a confluence of entrepreneurs, venture capitalists, corporate mentors, and future innovators, acting as a powerful accelerator for startup ambitions and reaffirming Karnataka's leadership in driving Deep Tech innovation across multiple sectors. Priyank Kharge also unveiled the official logo of the Future Makers Conclave.

The Future Makers Conclave, scheduled for November 20, 2025, is envisioned as a vibrant gathering of over 10,000 founders, entrepreneurs, investors, mentors, and ecosystem leaders. Designed to be a high-energy celebration of innovation, the conclave will showcase India's most promising AI and Deep Tech startups through show-and-tell sessions, keynote addresses by industry icons, unicorn founders, investors, and thought leaders.

Positioned as a global innovation platform, the Future Makers Conclave will, for the first time, feature international participation—bringing together global startups presenting their innovations in India, while Indian startups will have the opportunity to showcase their technologies to global markets.
