Thyrocare sets up new diagnostic lab in UP in association with SecondMedic

10 June 2026 | News

Expands presence in Prayagraj, bringing reliable, accurate, and affordable diagnostic services

Thyrocare Technologies has announced the set-up of its new diagnostic laboratory in Prayagraj, Uttar Pradesh (UP), in association with SecondMedic.

The new facility was inaugurated by Rajdeep Panwar, Chief Commercial Officer, Thyrocare Technologies. Prior to this launch, Thyrocare operated three laboratories in Uttar Pradesh, located in Lucknow, Noida, and Varanasi. With the addition of Prayagraj, the company further strengthens access to diagnostic services across the state.

The new laboratory is equipped with advanced testing infrastructure and supported by trained professionals, enabling timely and error-free diagnostic results. It caters to both specialised as well as routine testing requirements, offering support to ongoing and preventive healthcare needs.

This expansion aligns with the consistent focus of Thyrocare towards meeting the increasing demand for reliable diagnostic services in emerging markets and bolstering its network. The Prayagraj diagnostic lab further expands the presence of the company in the northern part of the country.

With this launch, Thyrocare continues to expand its presence in Uttar Pradesh, with an emphasis on growing the accessibility of diagnostic services across cities beyond the metro markets. Thyrocare remains committed to strengthening its network and bringing reliable healthcare services closer to patients.
