Ex Apollo Construction Head Sanjeev Gupta leads execution of DJ Medicity in UP

18 June 2026 | News

Gupta brings over 28 years of experience in project execution, construction management

DJ Group of Institutions, a Delhi–NCR-based healthcare education network operated under the Jassar Dental Medical Education Health Foundation (JDMEHF), has announced the appointment of Sanjeev Gupta as Group Head – Construction and Planning, as it advances DJ Medicity, an integrated healthcare and education campus, with a focus on strengthening execution across clinical planning, operational efficiency, and quality benchmarks.

Gupta brings over 28 years of experience in project execution, construction management, and operations across healthcare, commercial, residential, and institutional infrastructure. Prior to this, he served as Construction Head at Apollo Hospitals, where he oversaw multiple greenfield and brownfield projects across India, including planning, budgeting, and execution.

His experience spans the development of large-scale, super-speciality healthcare infrastructure across leading private hospital networks such as Action Cancer Hospital, Yashoda Hospitals, Max Healthcare, and Artemis Health Institute—bringing a level of technical depth and execution rigour not typically seen in conventional medical college-led projects.

In his new role, Gupta will lead construction strategy, planning, and execution across the group’s infrastructure initiatives, with a primary focus on delivering the DJ Medicity project. He will oversee end-to-end execution, including design coordination, budgeting, vendor management, and regulatory compliance, aligning project timelines with the group’s broader vision of building a world-class healthcare ecosystem in Modinagar.
