Morepen starts commercial supplies under Rs 825 Cr CDMO mandate

01 July 2026 | News

First Rs 50 crore dispatch already completed in Q1FY2026-27

Morepen Laboratories has issued an update on its recently announced Rs 825 crore CDMO mandate. The first commercial dispatch, valued at approximately Rs 50 crore, has already been completed by the company under the programme during Q1FY2026-27. This marks the successful transition of the mandate from validation and qualification stage to commercial execution stage.

Commenting on the development, Sanjay Suri, Managing Director, Morepen Laboratories, said, “This is an important milestone in Morepen’s transition toward long-duration global manufacturing partnerships. Our teams have worked closely with the customer through validation, manufacturing readiness and supply-chain planning. Having started execution of commercial supplies, we are focused on scaling up, expanding capacity and building a stronger CDMO platform across additional customer and product opportunities.”

Having dispatched the first batch under the CDMO mandate, Morepen expects to scale the program further in the coming quarter, with additional supplies of approximately Rs 225 crore expected during Q2FY2026-27, subject to customer schedules and regulatory/commercial requirements.

The company continues to strengthen its manufacturing infrastructure to support larger contract development and manufacturing organisation (CDMO) opportunities. Total reactor capacity is expected to reach approximately 600 KL by the end of Q2, followed by further expansion toward 800 KL and 1,000 KL in subsequent phases.

The commencement of commercial supplies under this mandate reinforces Morepen’s strategy to build a scalable CDMO platform, deepen customer partnerships and participate in long-duration global manufacturing opportunities.
