Bioforum The Data Masters expands global footprint with new office and GCC in Bengaluru

25 August 2026 | News

New India entity marks one of the largest growth initiatives in the company's history

Bioforum The Data Masters, a global biometric CRO supporting clinical development through data management, biostatistics, statistical programming, medical writing, and project management for clinical trial sponsors worldwide, has announced its expansion into India with the establishment of a local company and the opening of its new office in Bengaluru.

The site is home to Bioforum's India Global Capability Centre (GCC), a strategic hub that brings together experienced clinical data managers, statistical programmers, standards experts, and technology specialists as part of the company's global delivery organization.

The India GCC joins Bioforum's global operations across the United States, Europe, Colombia, and South Africa, strengthening the company's follow-the-sun delivery model and its ability to deliver clean, compliant, submission-ready clinical data around the clock.

The India GCC is led by Dr Santhosh Kumar, Senior Vice President, India and Global Capability Center, who brings over 24 years of experience in the CRO and healthcare industry building and leading large-scale clinical data and global delivery organisations. The centre is expected to grow significantly over the coming year across clinical data management, statistical programming, clinical coding, validation, and other core delivery capabilities.
