Danaher expands Global Capability and R&D presence in Bengaluru

12 September 2026 | News

New space in Whitefield will add to Danaherâ??s growing GCC footprint in India

Danaher Corporation, a US-headquartered global science and technology company, is expanding its Global Capability Centre (GCC) and R&D presence in Bengaluru, with its Indian subsidiary DHR Holding India leasing 1,80,121 sq. ft. of office space in Whitefield, at Rs 88 crore for the next 5 years.

The new space will add to Danaher’s growing GCC footprint in India, supporting its global technology, engineering and R&D capabilities.

This new development directly augments Danaher’s existing India Development Center (IDC), which currently serves as a central operational node for the global conglomerate. The IDC represents 14 Danaher operating companies and has about 800 professionals, with capabilities spanning software engineering, product and hardware development, AI, machine learning, and data science.

Danaher's portfolio includes Beckman Coulter, Cytiva, Cepheid, and Leica Biosystems. United by the proprietary Danaher Business System (DBS), the corporation empowers researchers and healthcare professionals globally to solve the most critical challenges in disease detection and biotechnology.
