Neuberg Diagnostics and NM Medical to build integrated diagnostics network in Maharashtra

06 October 2026 | News

Neuberg will expand across Maharashtra through integrated diagnostic centres

Neuberg Diagnostics has announced the consolidation of its Maharashtra operations with NM Medical, bringing together some of the state's most respected diagnostic brands and clinical leaders under one unified network.

The partnership combines NM Medical's four decades of expertise in advanced radiology, cardiology and preventive wellness with Neuberg's specialised capabilities in Genomics, Metabolomics, Proteomics, Digital Pathology, Immunohistochemistry, Molecular Diagnostics, Nephropathology and Neuropathology.

Patients across Mumbai and Maharashtra will benefit from convenient access to routine and highly specialised testing, advanced imaging and comprehensive preventive wellness through an expanding network of integrated diagnostic centres, advanced pathology laboratories, wellness centres and collection centres.

For clinicians, bringing imaging, pathology, molecular diagnostics and genomics together will provide a more comprehensive view of each patient, supporting earlier detection, precise diagnosis, personalised treatment decisions and better disease monitoring.

The Maharashtra platform will be led by Dr Nilesh Shah as Chairman, Dr Ajay Shah as Chief Mentor - Pathology, Dr Asish Atre as Chief of Radiology, and Dr Kunal Sehgal and Dr Jay Mehta as Heads of Pathology.

Rahil Shah will serve as CEO - Maharashtra, Preventive Wellness & Africa Operations, Neuberg Group, driving the integration and expansion of the network.

Under this leadership, Neuberg will expand across Maharashtra through integrated diagnostic centres, advanced pathology laboratories, comprehensive wellness centres and collection centres, bringing advanced diagnostic services closer to patients and clinicians.
